

## Translate your report into any of nine different languages...

### TRANSLATE

Select any one of the nine different flags to automatically translate the report into your chosen language.

The screenshot shows the 'Report view' interface with a 'Translate' button highlighted. Below it, a grid of nine flags represents different languages: Deutsch (German), Español (Spanish), Français (French), Italiano (Italian), Portuguese (Portuguese), Русский (Russian), 汉语 (Chinese), 日本語 (Japanese), and 한국어 (Korean). The current translation language is set to Japanese. The main content area displays a side-by-side comparison of the '3.3 Unemployment' section in English and Japanese. The English text discusses unemployment trends since the mid-1970s and the impact of the 2008 financial crisis. The Japanese text provides a similar overview, noting that unemployment levels have generally declined since the mid-1970s but have risen significantly since late 2008. A 'VIEW' button is visible at the bottom right of the report content.

### VIEW

See the original report in a side-by-side format with the translated text. You can gain a clearer understanding of the document without the need to refer to a dictionary.
