Approach and Methodology

Our research and consultancy services are designed to ensure that your objectives remain firmly in focus.

We concentrate on producing practical and workable solutions and recommendations, appropriate to your needs and in line with your project's objectives.

The scope of the project and key issues are initially discussed. We would then present a full written proposal detailing the objectives, nature, and scale of the project and the methodology for completion.

Your project will be managed by an experienced research/project manager or director, who will be involved in all stages of the process including planning, interviewing, analysis, report presentation and client liaison.

This results in a clear understanding of the issues, gives continuity of approach, and ensures that a strategic overview of the project is maintained.

We have extensive experience in market research and in employing external market information to fulfil client requirements.

Our aim is to provide relevant recommendations and solutions which can be implemented in a practical and straightforward manner.
